

Double Cone Mixer

The mixers are widely used in pharmaceutical, chemical, food industries and especially suitable for mixing various solid materials with large volume.

Features:

Through the vacuum conveyor for the machine, send the powder or grain state materials into the double-taper container, or send the materials into the container manually. As the container rotates continuously, the materials moves complexly in the container so as to get the uniform mixing.

Technical Parameters

Model	Gross volume(L)	Working volume(L)	Mixing time(min)	Rotary speed(rpm)	Power (kw)	Weight (kg)
50	50	30	4-8	20	0.75	160
100	100	60	4-8	15	0.75	220
200	200	120	4-8	12	1.1	280
300	300	180	6-10	12	1.1	380
400	400	240	6-10	12	2.2	450
500	500	300	6-10	12	2.2	550
600	600	360	6-10	12	3	600
1000	1000	600	6-10	12	4	700
1500	1500	900	6-10	12	4	900
2000	2000	1200	6-10	12	7.5	1500
2500	2500	1500	6-10	12	7.5	1800
3000	3000	1800	6-10	7.8	7.5.	2200
