

ZHCZ-4 Weight Filling Machine

This weighting filling machine is for filling 10kg to 50kg liquid. It automatically achieves counting inlet bottle, gravity filling, and bottle outlet. It is especially good for filling SL, edible oil and lubrication. It is a nice choice for foodstuff pharmacy, cosmetic and chemical industries.

Major Characteristics:

- ◆ This weighing filling machine is for filling 10kg to 50kg liquid..
- ◆ Each filling head has the weigh and feedback system, each filling head can be regulated
- ◆ This type filler adopts PLC to control, touch screen control panel
- ◆ It applies dive method to fill and it reduces foam.
- ◆ This machine adopts PLC and touch screen control panel, so it is convenient to set.
- ◆ Each filling head has the weigh and feedback system, each filling head can be regulated.
- ◆ Photoelectric sensor, approximate switch and other electric elements are of the international famous brands. It ensures no container miss filling. The host machine will alarm if there is any container blocked.
- ◆ It applies dive method to fill and it reduces foam; it is suitable for various kinds of filling products.
- ◆ The whole machine meets GMP standard, it is easy to clean and maintain, and the parts which contact with the filling material are made of high quality stainless steel. The whole machine is safe, eco-friendly and sanitary. It adapts to various kinds of working places.

Main Performance parameter:

- Outline Dimension (L×W×H):2500mm×1700mm×2300mm
- Number of filling Head:4
- Suitable bottle:Length:160mm~360mm
- Width:140mm~260mm
- Height:250mm~500mm
- Diameter of bottle mouth:≥Φ40mm
- Suitable range:5L~50L
- Production capacity:≤480bottles/hour(tested by water)
- Filling Error:±15ml
- Voltage:220V;50Hz
- Power of host machine:3kw
- Pneumatic (air-operated) source:0.5Mpa~0.65Mpa clean and Stably compressed air
