

ZL14-2.5L Multihead Weigher Packing Machine

It's suitable for granule, chunk, flakes products, such as snacks, cheese, pasta, candies, pet foods, IQF frozen foods...

Ideal for quantitative weighing of granule, slice, flake, roll or irregular shapes materials, such as candy, snacks, pasta, IQF frozen food, cheese, rice, pet foods and other non-food products.

Features

- Touch screen interface
- Language support
- IP65 waterproof and dustproof design
- Program and mechanism diagnostic function
- Auto-selection and one-plus two collecting hopper system
- High precision digital weighing sensor
- Adjustable opening angle of stepper motor to obtain high precision
- High-Speed and High-Accuracy mode is optional to pick
- Combination bucket could dump orderly to avoid products jam up
- User friendly operation manual could read on the touch screen
- Powerful statistics function, recording every batch production data
- Pieces counting function
- Enclosed stainless steel construction

Technical Data

- Weighing Range: 100-3000g
- Accuracy: $\pm 1-5g$
- Weighing Speed: Max. 70 Drops/Min
- Hopper Volume: 5L
- Driver: Step Motor
- Options: Timing Dipper, Printer, Diverter Device, Rotary Top Cone
- Control Panel: 10.4 inches large touch screen
- Power Requirements: 220V,50/60HZ,12A,2KW
- Machine Weight: 650KG
- Packing Dimension: L2230 x W1420 x H1870mm
