

FZ-100 Semi Automatic Granule Weighting and Filling Machine

In the food, pharmaceutical, and chemical industries, consistent dosing accuracy for powder and granule products is critical for quality control and minimizing material giveaway. The FZ-100 semi automatic granule weighting and filling machine is an economical solution designed for high-precision measurement and packaging of various dry, free-flowing materials, including powders, granules, tea, and seeds.

This system serves as the perfect cost-effective upgrade from slow, inaccurate manual methods. By utilizing its precise weighing technology, the FZ-100 semi automatic granule weighting and filling machine guarantees reliable weight consistency, which directly contributes to enhanced quality control and significant cost savings by eliminating material giveaway. The versatility of the FZ-100 semi automatic granule weighting and filling machine makes it the ideal investment for small-to-medium batch production across multiple sectors.

Technical Parameters

Model	FZ-100
Power Supply	220V 50/60HZ
Output	0-20 Bottles/min
Filling Accuracy	±0.3%
Filling Range	1-99g
Filling Head	1
Dimension	400*350*650 mm
