

SED-650SF Tablet Deduster Machine

SP series screening is a new generation products and special structure design and adopts the principle of electromagnetic vibrate, the advantage of small floor area, high efficiency, Low energy principle of electromagnetic vibrate, the advantage of small floor area, high efficiency, lower energy consumption and etc. meet with GMP requirements.

Principle of the structure vibrated griddle: use upright motor as the source of vibration, equipped eccentricity hammer on the both sides of the top and the bottom, change circumrotate to level, upright and slope movement, then pass these three movement to the surface of the griddle.

Ad-just the phasic angle on the both sides of the top and bottom to change the movement orbits of the surface griddle.

Detailed Parameters

De-dusting chamber diameter (mm)	137
Max Rotating Speed(Rotary/min):	60
De-dusting hole diameter:	3
Motor power (w):	60
Rated voltage (v):	220
Frequency (hz):	50
Compressed air pressure(kg):	4
Net weight(kg):	30
