

SED-80ZB-N High-speed Automatic Pillow Type Candy Packer

The machine is suitable for simple-grain hot pillow type packing of candy. It adopts stepless high speed, continuous full-automatic operation. Advanced structure, stable running and convenient adjustment.

It is equipped with photoelectric eye to track color index automatically, and it has preponderances of a reliable and accurate orientation. Low noise and good performance.

Candies packed by this kind of machine will be characterized on beautiful shapes, strong sealing performance, good sanitation qualification and long preserved time, so the machine is pillow type packing equipment that packing speed is the quickest at present in China.

Feature of Packing Machine

1. This machine has functions of error alarm auto display, safety protective door, and safety switch.
2. The machine adopts touch screen operation to show operation condition, operation instruction, error display, production quantity count; which make machine operation more visualized.
3. The machine can install wrapping paper auto connection device, which achieves wrapping paper changes without stopping machine..
4. The machine has successfully been designed to be fast in packing speed, less empty bags and stable in performance. Besides it also has device for removing empty bags.
5. The machine has also been designed to be durable in use and easy to change spare parts.
6. Using of timing belt makes machine to be less noisy while working.

Product Parameters

Production Capacity	800 bags/min
Packing Specification	Oblong, quadrate, round, oval and shaped
Length of Finished Bag	45-80mm
Gross Power	3.5Kw
Overall Dimension	3000*1350*1450
Gross Weight	860kg
Power Supply	220v 50Hz
