

SLF4-50 4-Side-Seal Powder Sachet Packing Machine

Automatic powder dosing, forming, sealing and cutting in a four-side-seal format. Specify the powder properties, sachet dimensions and opening detail for the final configuration.

A flat powder sachet sealed on all four sides

The four-side-seal format gives the pack a defined sealing border. Final dose, film and artwork must be reviewed as one packaging specification.

What matters on the SLF4-50

Auger filling

The stated powder filling system uses an auger. Confirm the screw setup against the powder sample and target dose.

Four-side sealing

This model is specified for four-side-seal powder packs, with straight cutting and an easy-tear option.

Integrated alarms

Listed alarm functions support operation through the forming, filling, sealing and cutting cycle.
