

## *KFG-W mini powder filling machine*

KFG-W mini powder filling machine is auger type powder filling machine used in pharmaceutical or labs. the machine adopts the PLC to control , use the servo motor to drive the auger, the filling weight can be set from touch screen, can set the filling weight without stop machine, stop filling in case of no vial, stop machine if the auger contact with powder loading sleeve. Equipped with the alarm indicator on the machine. Adopt the divided disk to transfer the vial, high accurate positioning, simple and small structure, reliable. Wide filling range, lower filling error, stable production, can filling different kind of powder.

### **Main technical parameter:**

Vial size	7ml-25ml
Auger number	1
Productive capacity	10-30 vial/m
Filling range	0.1-2.5 g/vial
Filling error	≤±3% based on standard weight
Vacuum degree	6×10 <sup>-3</sup> Mpa
Vacuum consumption	4L/S
Voltage	380 v
Weight	130 kg
Outside dimension	900×460×900 (mm)
