

HTGF-100 Aluminum/Plastic Tube Filling Sealing Machine

Thank you for your visiting, our company is specialized in producing various soft tube, plastic tube, composite tube, aluminum tube filling and sealing machine, suitable to a variety of toothpaste, cosmetics, skin care products, protective creams, ointments and other paste filling.

My company has a variety of filling and sealing machine, high-speed, automatic, semi-automatic, rotary, reciprocating, plastic tubes, Aluminum tubes, internal heating, external heating and other filling and sealing machine, for the diameter of 11 -50mm, filling range if 2-250ml.

Optional devices are water-cooled machines; automatic pumping material feeding machine, multicolor code editor, and other requirements can be customized depending on your need.

Used for plastic/laminated tube package such as toothpaste, cosmetics, food, medicine

Features:

- 1) Mechatronics mechanical-electrical integration
- 2) PLC control system
- 3) Color touch screen display
- 4) Automatically feeding tube into tube holder
- 5) The photoelectric target-aiming working station employs accurate detector and marching-type motor, ensuring the tube design at the correct position.
- 6) Filling nozzle enters tube inside to fill. As it fills it will move up and prevent material from overflowing and spilling.
- 7) No tube no filling
- 8) Automatically printing the character code on the tube bottom

Specification:

Type	HTGF-100
Voltage	220V/380v/50Hz/60Hz
Productivity	80-100pcs/min
Filling volume	5-250ml (change molds)
Tube diameter	16-35mml (change molds)
Tube length	50-250mm
Max power	7.5kw
Water consumption	3-6L/min
Machine weight	2000kg
Dimension (L*W*H)	2250×1000×2200mm
