Automatic Wet Glue Labeling Machine

The Automatic Wet Glue Labeling Machine is equipped with advanced technology, which can effectively curb the five most important causes of downtime, thereby improving the efficiency of production line terminals. It can eliminate more than 80% of wearing parts without continuous maintenance. Regardless of the production line output and packaging size, the speed can be as high as 150ppm, and one label will not be missed. The automatic detection and control function of label and roll paper force can shorten the setting time and reduce the manpower required. Using a single intuitive touch screen interface, users can easily check status and select jobs. The built-in label database, automatic code creation, intuitive job selection and powerful diagnostic functions combine to help avoid coding errors and improve efficiency.

The Automatic Wet Glue Labeling Machine ensures that the direct labeling function eliminates the need for labeling components and factory air supply, while reducing the number of mislabeled and misplaced labels during the labeling process. The installation is simple and the footprint is small, which helps keep the production area clean and spacious.

Product Specification:

Label accuracy	±1mm
Machine capacity	2000～6000pcs/hour
Machine dimension(length*width*height)	3000 * 900 * 1190mm
Product range	Diameter：30mm～120mm height：60mm～300mm
Label size range	Length：60mm～360mm Width：60mm～150mm
Machine Voltage	220V/50HZ
Machine Weight	550Kg
Machine Power	1. 5KW
Condition temp	0-50°
Condition Relative Humidity	15-85%
