

Automatic Sleeve Wrapping Machine

The automatic sleeve wrapping machine is suitable for wrapping and then shrinking cylindrical products like bottles, cans, boxes, big carton, bags, etc with or without bottom tray. The whole process of sealing is mainly conducted in two steps

- 1) Wrapping the product from top and bottom with the film.
- 2) Shrinking the film around the product pack it perfectly.

Useful for all types of Bottles, Cans, Cartons, Matrix of boxes, etc.. can easily be packed with this machine

Technical Specification:

Voltage (V / Hz)	300 V/50 3 Phase
Power consumption	1.5
Packaging Speed (pcs / min)	0-12
Max. Package dimension (L x W x H)	500 x 290 x 380
Working air pressure (Kgf / m ²)	6
Weight(Kgs)	300
