

## *Automatic Linear Three Sticker Labeling Machine PM-350*

This Adhesive labeling machine used for food, medicine, cosmetics, electronics, hardware, auto parts, stationery, batteries, all kinds of oil round bottles, and a variety of different specifications of the packaging products, automatic labeling machine work.

### **Features:**

1. Wide range two-way adjustment and six dimensional space direction adjustment mechanism
2. The length of the product can be identified automatically and detected by double photoelectric switch
3. The double pressure bar can send the label actively, and the label can be tensioned actively, which is convenient to install the bar code detection device
4. The labeling roller or labeling brush can be installed according to the needs to reduce the wearing parts
5. The equipment is fully automatic, without the need for special care
6. It has label detection function and no label alarm function
7. The bottom paper recycling roller adopts the quick replacement type, and the waste paper can be taken out by gently pulling up the knob
8. The main motor adopts 750W high-power servo motor from Schneider of France, and cooperate with Schneider servo motor driver to carry out closed-loop control on the feeding of the label, which can control the stop accuracy of the label within 0.3mm
9. German sick wll180t is used as the product detection sensor, and the detection speed is 50KHz
10. Set up special product detection switch adjustment bracket to realize rapid adjustment of detection points
11. The machine adopts pressure-sensitive labeling. Under the action of the sponge roller, the label is in line contact with the pasted object to ensure that the labeling is smooth and free of bubbles.
12. All stainless steel frame, clean and generous appearance, durable.

**Technical parameters:**

<b>Model</b>	<b>PM-350</b>
Max Capacity:	8000-10000 Bottles/hour
Label length	10-350mm
Label height	15-205mm
Bottle diameter	Dia <120mm
Label material	Self-adhesive label / Sticker label
Electrical power	3kw
Overall dimensions	3000*1500X1650mm
Weight	400kg
