

Syrups Filling Machine

The full-automatic servo piston syrups filling machine is one of our automatic filling machines. It adopts the servo motor driving mode, which has stable filling speed and low gas consumption. The filling mode of fast first and then slow can be set, which is more intelligent and humanized. Filling is used for automatic quantitative filling of Baijiu, perfume, edible oil, beverage, cosmetics, honey and other bottled paste liquids. The syrups filling machine is suitable for users in food, medicine, cosmetics, petrochemical industry, or frequently changing materials and cleaning requirements.

Product parameters:

- Voltage: 220V 50 / 60Hz
- Power: 1.5W
- Air source: 0.5-0.7mpa
- Filling range: 50-5000ml (multiple specifications are available)
- Filling speed: 1000-3500 bottles / hour
- Number of filling heads: 2-16
- Applicable bottle height: 30mm-300mm
- Error: $\leq \pm 0.5\%$
- Weight: 350kg
- Overall dimension: 4000 × 750 × 1750(mm)
- Packing method: wooden case
