

GTI-Z85 Automatic Pharmaceutical Capsule Filling Machine

Our Automatic Capsule Filling machine is widely used in pharmaceutical industry, health-care products etc. This machine adopts advanced full-sealed structure with novel appearance and possesses the advantages of adjustable medicine filling, precise dosage, high rate of capsule getting on the machine, frequency conversion speed regulation, safety and simple to operate etc. It's suitable for filling form of medicine such as active material, starch, lactose, filling material, diluents or lubricant etc. It can automatically complete the whole capsule filling process including capsule separating, filling, waste rejecting, capsule recapping, finished product pushing, waste capsule removal etc.

Z series capsule filling machine is specially designed for drug filling of hard capsules, and various models of machines are available. It is widely used for filling different kinds of drugs due to its multi-purpose, perfect function, reliable performance and accurate filling. It has unique design and can complete the mixed filling of different drugs in the same capsule.

GTI-Z85 Automatic Capsule Filling Machine processes the products for optimal productivity up to 40,000 capsules per hour, featuring low-maintenance operation, minimal downtime, and overall dependable production. Filling of pellets is available. With different specifications of mould, No. 00 to No. 5 hard capsules and safety capsules A, B, C, D, E can be filled. Both slow-released pellets fill and mixed fill with powder and pellets can be realized.

Technical Parameters:

Model	GTI-Z85
Capacity	85,000 caps/hr
Number of Capsules (per cycle)	2
Power	380/220V 50/60Hz
SNR	<75dB
