

Semi Automatic Ultrasonic Soft Tube Filling And Sealing Machine MT-6A

Application:

- This machine is designed specially for plastic soft tube filling and sealing. (load tubes by hand)
- It works for both liquid and sticky products like cream, honey, tooth paste etc
- It is applicable to all kinds of plastic and plastic combined soft tube, with coder for date and so on. Same machine can work for both plastic and plastic aluminium composite

Feature:

- 1) It can perform the filling for ointment, cream jellies or viscosity material, sealing or tail folding, batch number embossing (include manufacture date) automatically.
- 2) The filling volume is adjustable on touch screen. It can fill 5-50ml etc liquid or sticky products.
- 3) The machine adopts most advanced ultrasonic tube sealing technology. Sealing effect is better and more beautiful than the other type.
- 4) It can print date or batch number as required. The number of letter can be set as required.

Work flow:

- Load tube by hand
- Filling automatically
- Ultrasonic sealing
- Tail cutting automatically

Parameter:

Speed	100-1500 bph
Filling volume	5-50ml or 50-300ml(customizable)
Filling accuracy	>99%
Ultrasonic power rate	1.0KW
Power supply	220V 50hz 1kw
Air supply	0.6MPa
Machine size	700*700*1300mm
