

## *Dry Powder Fast Granulation KZL-160*

The machine is widely applied in such industries as medicine, chemical industry and food, achieving good effect. With reasonably designed filter screen and rod, the machine can crush a pile of friable materials. According to the centrifugal force principle, it uses filter screen with special pores to carry out careful sieving. The special fiction filter screen rod can crush solid particles and grind large agglomerates.

### **Technical Parameters:**

- Model: KZL-160
- Capacity: 150-300 kg/h
- Dimension(L\*W\*H): 1060\*850\*1350mm
- Weight: 180kg
- Motor power: 1.5kw
