

FD-SSB Semi-Automatic Capping Machine

- The semi-automatic capping machine is fully pneumatically controlled and is particularly suitable for the closure of bottle products.
- Using a module made of a special material, the bottle with the cap is placed in the module, and the cap and the bottle are sealed by equalizing the air pressure.
- Working in the cylinder mode, no power supply is required, and the module is mechanically stretched and sealed. The sealing is beautiful and firm and the advantages are convenient operation and high speed.

Technical Parameters

Model	Sealing diameter	Cap height	Suitable for bottle height	Production capacity(pc/min)	Machine weight	Dimensions
FD-SSB	Ø30mm	10mm	300mm.	according to the worker's artificial speed	70 kg	455mm × 555mm × 1335mm
