

B•GFL-80 Aluminum Tube Filling Sealing Machine

The B•GFL-80 aluminum tube filling sealing machine is widely used for automatically filling and sealing ends to many products, such as toothpaste, shoeshine, cosmetic, hose drug, and so on. Combined with other equipment like automatic packaging unit, this filling sealing equipment becomes a production line for filling, sealing and packing. It can also be used independently. This equipment will accurately dispense products that are water-thin to viscous gels, mascaras to lipstick, shampoos, serums, lotions, and creams.

Main features of aluminum tube filling sealing machine:

1. This kind of filling and sealing machine is controlled by microcomputer.
2. Frequency control of motor speed.
3. Accurate color batch position.
4. Quantity of filling is very precise.
5. The code is printed at the end of tube.

Main parameters:

1. Dimension of soft tube: $\phi 16$ - $\phi 38$ mm
2. Location accuracy of color Code: ± 5 mm
3. Quantity accuracy of filling: $\pm 5\%$
4. Production: ≤ 80 pcs/min
5. Power: 1.5kw

Boom Industry is a professional manufacturer and supplier of the aluminum tube filling sealing machine in China. With 15 years experience of producing, selling and service in this filling sealing equipment, we have exported them worldwide like the United States, Japan, Russia, Australia, New Zealand, Indonesia, Malaysia, India, Burma, Italy, France, Nigeria, Vietnam, Iran, Syria, Kazakhstan, Poland, Romania etc, more than 80 countries and regions, and gain great reputation among those customers. If you need aluminum tube filling sealing machines, please contact us.
