

PST-C12 Semi Automatic Cylinder Top Round Bottle Sticker Labeling Packaging Machine

It is suitable for all kinds of cylindrical objects and small taper round bottles, such as xylitol bottles, cosmetic round bottles and wine bottles. It can realize full cycle/half cycle labeling, circumferential positive back labeling, and the distance between positive and negative labels can be adjusted arbitrarily.

Circumferential location detection device can be optional to realize circumferential location labeling.

It can be equipped with color tape printer and ink-jet printer, which can print production batch number and other information at the same time to reduce packaging process and improve production efficiency.

Product Feature

- 1) Applicable labels: sticker, non-drying film, electronic supervision code, bar code, etc.
- 2) Applicable products: products with labels required to be affixed on circular surface and conical surface; May stick single label or double label.
- 3) Application industry: widely used in food, medicine, daily chemicals, electronics, hardware, plastic and other industries.

Parameters:

Labeling precision	±0.5mm
Labeling speed	20-40pieces per minute
Suit bottle size(mm)	Φ15mm~φ160mm
Suit label size(mm)	length: 15mm~380mm
	bottom paper width:10mm~180mm
Label's drum inner radius	Φ76mm
Label's largest outer radius	Φ280mm
Machine Size(L*W*H)	920mm*420mm*500mm
Applicable power supply	220V/50HZ
Machine weight	35Kg
