

NBR-260 Automatic Blister Packaging Machine

It suitable for PVC, PET preheating and molding blister. After adding material, automatic positioning suck function of paper card, thermal bonding location, cutting location, to complete toothbrush, toys, electronic components, batteries, cosmetics and so it paper card type multi-functional packaging machine. This machine has been declared national invention patent and several practical new-type.

Main technical parameters

冲裁次数 Cutting frequency	10-20plates/min
生产能力 Productivity	30-40pieces/min
最大成型面积 Max.forming area	130×240mm
最大成型深度 Max.forming depth	26mm
行程可调范围 Adjusting range of travel	40-160mm
包材宽度厚度 Width and thickness of	PVC、PET 260×0.15-0.45mm
纸卡厚度 Thickness of paper card	250×500g
源及功率 Power supply	380V 50Hz Main motor主机1.5KW Hot-sealing4.5KW
耗气量 Capacity of air compressor	≥0.25m ³ /min
整机尺寸 Overall size	3000×700×1600mm
整机重量 Weight	2000Kg
