

Plastic Bag Sealing Machine FR-900V

Plastic bag sealing machine is a machine to seal the container filled with packaging, after the product is loaded into the packaging container, in order to make the product sealed and preserved, maintain the quality of the product, to avoid the loss of the product, it is necessary to seal the packaging container, this operation is completed on the sealing machine.

FR series continuous film sealing machines finish continuous carrying, sealing and printing in one operation. The machine can be made horizontally, vertically or with stand feet.

It adopts electronic constant temperature mechanism and stepless speed regulating transmission motor. It can seal plastic film in various kinds of materials.

Product Properties

1. The excellent product quality good vertical sealing machine can finish continuous carrying, sealing and printing in one operation. It can be made horizontally, vertically or with stand feet.
2. The excellent product quality good vertical sealing machine adopts electronic constant temperature mechanism and stepless speed regulating transmission.
3. It is suitable for medicine, pesticide, food, daily chemical, industries of the aluminum foil bag, plastic bag, compound bag sealing.
4. This equipment has the perfect sealing, high efficiency; Simple and compact structure, small volume; Beautiful shape, advanced technology, low power consumption; The advantages of convenient operation and maintenance, it is an ideal sealing machine.

Technical Parameters

Model	FR-900V
Voltage	110V/220V 50-60HZ
Power	500W
Sealing speed	0-12m/min
Sealing width	6-12mm
Temperature range	0-300°C
Max. conveyor loading	3kgs
Printing category	Steel wheel printing
weight	19kgs
Machine size	850X420X360mm
