

HDL-450DT Without Pallet Automatic Packaging Machine

Product description:

Suitable for the batch packing without pallet of biscuit ect.

Features:

1. Work easily with positive quality and capability stabilization.
2. With frequency control, continuous change, photoelectric delectation and two way dogging, can eliminate availably the packing error.
3. Controlled assembly by PLC to reduce the trouble spot.
4. Have fixing motor stoppage function and can prevent availably the scalding film when the engine cut out.
5. Adopt the reversal dogging to raise the precision and ensure the cutting precision, avoid wasting the packing material.
6. Leaving out the box, decreasing the pollution, saving the cost.

Specifications:

Type	HDL-450DT
Film width	Max.450mm
Bag length	130-450mm
Product width	30-70mm
Product height	30-65mm
Film roll diameter	Max.320mm
Packaging rate	30-70bag/min
Power	220v 50/60Hz 3KW
Machine size	(L)5520*(W)820*(H)1400mm
Machine weight	About 10000KG
