

LONGMAKER

Packaging Machine model: LLD-K50/SY

This machine is intended for use in granular quantitative packaging. It uses a free-fall delivery system, fast and precise valves make the material feeding process frequent and stable. With an internal weighing bin, increase packaging volume. The final solution has a compact structure: free space, low power dissipation, good and laconic appearance.

Device name:	LLD-K50/SY
Equipment description:	Double Doumen double packing
Applicable scope:	Granular fertilizer, rice, seed, plastic particles
Equipment size: (m)	3×1×2.7
Equipment material:	Carbon steel, material contact part 304 stainless steel
Equipment weight:	900Kg
Weighing range: (KG)	5-50Kg
Packing speed: (bag / hour)	400-550
Weighing accuracy:	≤± 0.2%
Power supply:	AC220V±10% 50HZ 1.1KW/h
Equipped with gas source:	(flow)0.1m ³ /min (pressure)0.4-0.6Mpa
