

KB350X Horizontal Flow Packing Machine

Description

1. The horizontal packaging machine can automatically complete the products of fasteners conveying, measuring, filling, bag making, date printing, heat sealing and cutting etc.
2. Servo motor driving system is adopted in the packaging machine.
3. To ensure the same length of each bag, high sensitive electro- optical sensor system is provided to realize automatic alignment on the packing film.
4. This machine is equipped with a computer control system.
5. We have installed constant temperature heating system ensuring stable temperature and keep temperature is ± 1 °c.
6. The electronic and pneumatic components of the machine are all supplied by reliable supplier cooperating with us for several years, which can ensure the quality of machine and save the cost of purchase meantime.
7. The bag size and packaging number can be customized by customers.

Technical Parameters

Model	KB-350X
Film width	Max.350mm
Bag length	65-190mm or 120-280mm
Bag width	30-110mm
Product height	Max.60mm
Packing speed	40-200 bags/min
