

WRAPPING PROCESS EQUIPMENT

HAND FEED DOUBLE TWIST WRAPPER

OUR HAND DOUBLE TWIST WRAPPER MACHINE WRAPS IT WITH A TWIST ON EITHER SIDE.

This produces a familiar and classic style sweet wrap that's been around for decades and continues to be popular today.

An electronically interlocked guard with a magnetic safety switch ensures that if the guard can not be opened whilst the machine is in operation, if the guard is lifted the machine will automatically stop.

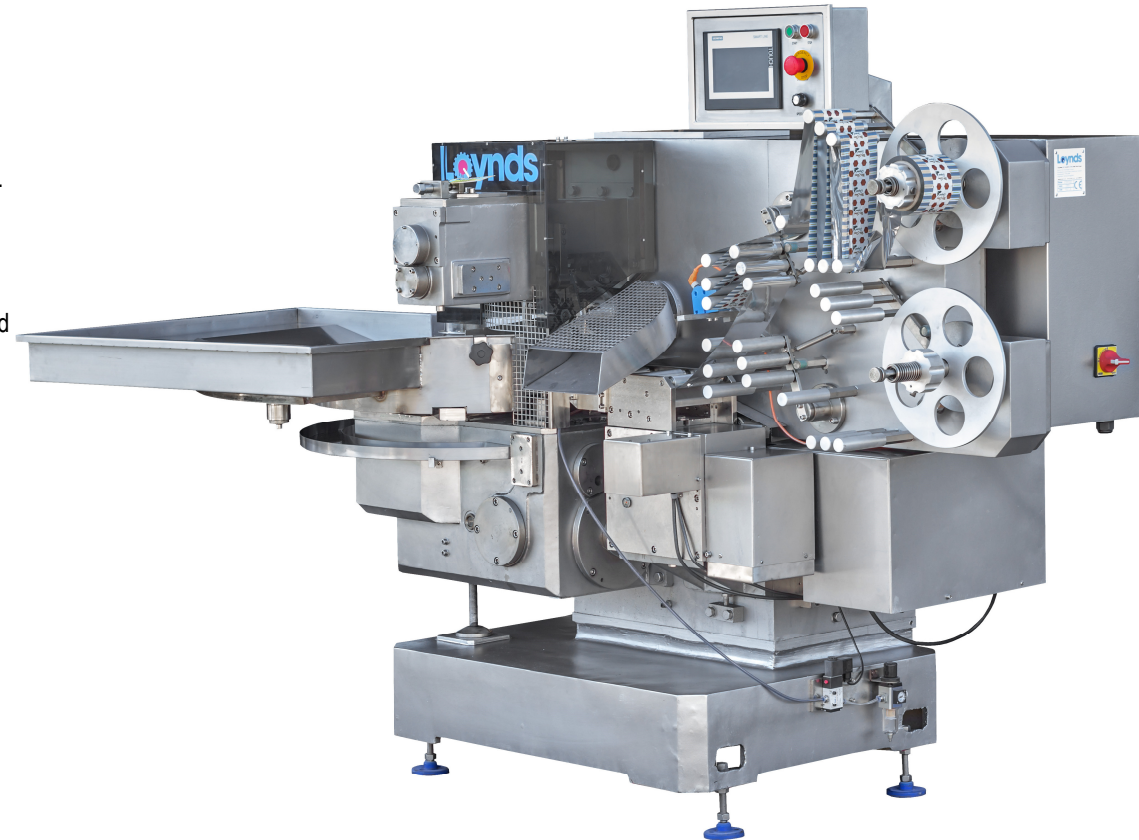

The double twist wrapper is hand fed by feeding candies, chocolates, caramels, fudges, jellies etc. into the feed plate, that is made specially for each different candy shape.

Capable of wrapping sweets within the following ranges: L:12-34mm W:12-34mm D:6-20mm

The speed is dependent on how fast an operator can feed the product into the feed plate, balls feed very fast sa 200 per minute where as squares take longer maybe 80 per minute.

FEATURES

- A double paper feed reel holder for inner wrap/quick changeover of reels
- An air-assisted paper feed system
- An electronic optical eye for 'no product, no film' sensing
- Lexan clear guards for the ultimate protection of the operator

WRAPPING PROCESS EQUIPMENT

HAND FEED DOUBLE TWIST WRAPPER

SPECIFICATIONS

Overall Height
1500mm

Overall Length
1790mm

Overall Width
915mm

Material
Painted Frame, Stainless Steel Contact Parts

Output
As fast as the operator can feed the machine.

Weight
900kg

Uses
Hand feed wrapping of pre-formed candies in a double twist wrap.
