

MB-10 Shrink Wrapper Machine

Shrink film packing machine applies to food & beverage industries as fruit juice bottle wrapping, tea bottle wrapping, drink bottle wrapping, dairy products bottle wrapping, pure water bottle wrapping, condiments bottle wrapping, beer bottle wrapping and sports drink bottle wrapping etc. It's suitable for various kinds of bottle types and bottle material, for example: PET bottle packing, can packing, glass bottle packing, round bottle packing, square bottle packing, irregular bottle packing, etc.

Features:

1. It is equipped with full automatic functions of bottle transferring and arrange, membrane packing, sealing and cutting, shrinking, cooling and shaping, etc.
2. The quick seal cooling structure guarantees that the seal has a higher strength even if under high speed production condition.
3. The inductive switch controls the membrane transfer system to reliably adjust and control membrane transferring length with less loss.
4. All the transfer system is controlled by frequency changing devices with stable and smooth transfer speed.
5. Unique thermal passage with centrifugal thermal air circulation system that has an equal heat distribution with beautiful and secure shrinkage effect.
6. 3 layers of heat insulation treatment with good insulating system that has an equal heat distribution with beautiful and secure shrinkage effect.
7. The enhanced cooling shaping passage can quickly turn the packaging membrane into high strength status that is conveniently stored and transported.

Model		MB-10
Power	KW	19
Operating Power Supply	v	TN-S 380
Packaging Speed	Pcs/min	10-13
Transfer Belt Dimension	mm	800-1200
Sealing and Cut Time	s	0.5-1.5
Temperature	°C	140-160
Air Pressure	Mpa	0.6-0.8
Air Consumption	m ³ /min	0.5
Max. Package Dimension	mm	L600×W400×H350
Thermal Shrinkage Passage Dimension	mm	L1800×W650×H450
Dimension of the Whole Unit	mm	L5500×W3200×H2100
