

LM-HS Series Full-Automatic Straight Line Type Piston Filling Machine

This rinser-filler-capper monobloc machine is mainly applied to pack juice, milk and other non-carbonated drink into glass bottle or PET bottle, its filling method is by negative pressure which produced by a vortex pump, and capper is suitable for twist off iron cap. This machine has advantages of higher automation and reliability in operation.

The series injection type/normal pressure gravity type dual-use filling machine is a high-tech product researched and developed by our company. It is suitable for products of various viscosity such as water injection, semi-fluid and ointment etc. It is widely applied for filling of products in such industries as food, cosmetics, medicine, grease, daily chemical industry, detergent, pesticide and chemical industry etc. By adopting straight the filling mode, it can be used to fill solutions of different types without the need of adding any spare parts.

主要技术参数 Main Technical parameters

型号Type	LM-HS系列 (6头、8头、10头) LM-HS Series (6 heads、8heads、10heads)
灌装速度Filling Speed	80-100瓶/分钟 (指250ml/10头)
灌装精度Filling Precision	±1%
缸体规格Cylinder Specification	有25-250ml、50-500ml、100-1000ml、250-25000四种
工作气压Working Pressure	5-7kg/m ²
机器净重Net Weight	950kg
外形尺寸Dimension	2000×810×2200mm
