

## ***XT-FGJ100A1 Semi-Automatic Can Body Rotary Can Sealing Machine***

1. Seaming rollers are made of stainless steel 304# with high hardness, rust-proof and excellent sealing performance.
2. Left and right Seaming rollers are simple and reasonable in structure, convenient to adjust.
3. All electrical components adopt well-known high-end parts which have stable and reliable performance.
4. Structure is simple. Easy for maintenance. Can body will rotary when sealing. Suitable for dry food.
5. For various of round tin cans, aluminum cans, paper cans and PET cans. It is an ideal equipment of food, beverage, pharmaceutical and other industries.

### **Product Details:**

- Material: Stainless steel
- Qty of sealing head: 1
- Sealing speed: 10-20pcs/min. (depending on worker's proficiency)
- Sealing height: 35-200mm (shall be customized in case of exceeding 200mm)
- Can diameter: 35-180mm
- Working voltage: AC220V 50/60Hz
- Electricity power: 0.55KW
- Weight: 100KG
- Dimension: 450\*550\*1450mm;
- Payment terms: TT (30% before production, 70% before shipment)
