

Automatic 32-channel Candy Counting and Bottling Machine RQ-DSL-32

RQ-DSL-32 Gummy bear counting and bottling machine produced by Guangdong Rich Packing Machinery Co.,Ltd adopts the most advanced vibration multi-channel blanking method in the world and is designed according to GMP standards.

The RQ-DSL series electronic counting machine can be widely used in a variety of different sizes and sizes of tablets, capsules, pills, transparent soft capsules, gummy bears, etc. The counting and bottling accuracy rate reaches 99.5%, which has reached the advanced level of similar foreign machines.

>>This series of counters use Siemens touch screen control system, easy to operate. Main machine made of stainless steel 304, material contact part made of stainless steel 316, it meet the GMP requirement.

>>About flip plate structure, most of the factories adopt horizontal close structure, may damage or crack the capsules or tablets. Our counting machine flip plate structure: after feeding the material, using the device to close from the bottom to the top, can effectively avoid the damage to capsules or tablets.

>>The tablet counting and bottling machine can be applied to bottles of different sizes, only need to replace and adjust 1-2 parts. Only one hex wrench is needed to disassemble the machine, which is convenient for cleaning.

Technical Parameters:

Production capacity	40-120 bottles/min
Accurate rate	> 99.5%
Applicable material	Φ3~25mm tablets,pills, 000~5# hard and soft capsules
Loading Capacity for Per Bottle	2~9999 pcs
Applicable Bottle	10~500 ML round and square plastic bottle
Power	220V 50Hz
Total Power	2.2 kW
Air Pressure	0.6 MPa
Gas Consumption	45-60 L/min
Weight	620 kg
Overall Size	2160*1650*1650mm
