

Semi Automatic Wheat Flour Filling Packing Machine LGTB-500

Semi automatic wheat flour filling packing machine is suitable for packaging wheat flour, milk powder, rice powder, sugar, coffee, monosodium glutamate, solid beverage and other powder products. Wheat flour packing machine packing of the products appearance beautiful, exquisite packaging, can effectively achieve the protection of products, for example, moisture proof and waterproof function. After packing, the product is very convenient for transportation, and can greatly improve its added value, increase company profits.

Feature:

Wheat flour filling machine is a kind of high quality semi-automatic packaging machine which the company introduces foreign advanced technology, improvement and production.

The machine simplifies the system installation and adopts simple system control, making the operation more simple, and can effectively improve the production efficiency and save the labor cost.

Wheat flour packing machine is equipped with a special measuring system, which has a more effective combination scale and can effectively improve the measurement precision from the bottom.

In addition, the machine is equipped with a touch human-computer interface control, which can greatly improve the control accuracy, solve the waste of raw materials from the source, and save the company's production costs.

Wheat flour filling machine adopts high precision automatic image transmission system, and it is equipped with advanced automatic positioning, digital temperature control and photoelectric tracking system independently developed.

What is more, it can also improve the level of packaging equipment to a certain extent, packaging products beautiful appearance, easy to transport.

Wheat flour filling machine is equipped with reliable quality circulator, easy to operate and easy to maintain. The machine is suitable for all kinds of packaging materials, which can meet the customers' different requirements for packaging materials. This machine is the first choice in the food packaging industry.

Technical Data:

Model	LGTB-500
Packing Weight	10-5000 gram
Accuracy Level	1.0
Packing Speed	1200-2500 bags/h
Dimension	690*1060*2000mm
Voltage	AC380v/50Hz/1.1kw
