

Fixed Pump Injection Molding Machine WB-128F

We sell the injection molding equipment in 3 types, fixed pump type, variable energy-saving type and servo energy saving type. Here we will produce the fixed pump injection molding machine.

Feature

- Reinforced clamping system meets efficient and fast production demands.
- The superior molding opening and closing characteristics with further optimization of the linkage construction make the machine run faster and more stable.
- Centralized lubrication, reliable protection.
- Concise and easy appearance. Machine body forces more reasonably with high rigidity.
- Professional and optimized designed mould platen. High rigidity and high strength
- Multifunctional humanized controls system with dedicated operation interface, easy operation, fast reaction, good reliability and good extensibility.
- Professional designer plasticizing unit is suitable for different plastic materials.
- With double cylinder injection

Technical Parameter

Model	WB-128F		
INJECTION UNIT		A	B
Screw diameter	mm	38	40
Shot size(theoretical)	Cm ³	256	280
Shot weight	g	230	252
Injection pressure	Mpa	176	160
Injection rate	g/s	95	100
Screw L/D ratio	L/D	23,4	22,2
Screw speed	r.p.m	0-190	
Nozzle Diameter	Srmm	10
