Standards for Labeling Machine TB-150

This machine uses large quantities of aluminum and high strength, the corrosin-resistant stainless steel, so that the overall structure of the machine more durable and it"s performance is more modular, user-frirndly design makes the adjustments more easily and change style much simpler. Using the man-machine interface in the control ststem, which is easy to leam and under-stand

Technical Parameters:

Model:	TB-150
Labeling speed:	150-180 (bottle / min)
Maximum label width:	10~130mm, length: 15~300mm (which can be designed according to customer requirements) (mm)
Type of packing:	Cup, tube, cans, boxes, bottles, cans, boxes, cans and other
The stuck object size:	10~230mm (can be designed according to customer requirements) (mm)
Structural materials:	SUS303/304 stainless steel
Power supply:	one-way AC 220V + 2%, 50/60Hz
