

## *Food Grade Constant Temperature Vertical Mixing Filling Machine AFM-SM*

This Mixing Filling Machine is suitable to measurably fill the ointment materials with high viscosity and poor flow ability. The hopper is equipped with a frame mixing system. The machine is easy to clean and operate, conforming to GMP standards.

### **Main Features:**

1. This Mixing Filling Machine can be pedal and automatic filling operation.
2. The Constant Temperature Filling Machine filling speed and filling volume are adjustable according to your requirements.
3. Vertical Filling Machine is with heating & stirring application, hot water recycle heating way.
4. The Heated Filling Machine is suitable for liquid, cream, paste, lotion, detergent products, etc. It is widely used in chemical, pharmaceutical, daily chemical care industries etc.
5. Easy to operate, high quality, good performance, compact structure, long service life.
6. Recommended matching products: Bottle Cap Locking Machine, Round Bottle Labeling Machine

**Technical parameters:**

<b>Item</b>	<b>Description</b>	<b>Remark</b>
Material	SS316L for all contact products part,Other parts SS304	
Filling range	Different filling volume For your option (Can do customized)	10-100ml, 50-500ml
Hopper	30L volume, double jackets	
Mixer& heating	paddle mixing: 0.37KW; electric heating elements: 0.75KW	
Filling speed	0-30BPM	
Air Pressure	0.5-0.8Mpa	
Voltage	220V,50Hz, Single Phase
