

Automatic Honey Filler Glass Jar Honey Filling Machine

The filling machine is specially made for liquid with paste such as tomato paste, honey, jam, gel, peanut butter, oil etc. The automatic honey filling machine adopts Japanese Mitsubishi PLC program system to control. The machine adopts piston pump and for filling. By adjusting the position pump, it can fill all of the bottles in one filling machine, with quick speed and high precision.

Features:

1. The flow control devices of each filling head are independent of each other, precision adjustment is very convenient.
2. The material of the machine material contact part can use the food grade material according to the products feature, in line with the GMP standard.
3. With regular filling, no bottle no filling, filling quantity/production counting function etc features.
4. Convenient maintenance, no need any special tools.
5. Using drip tight filling head, no leaking.
6. Photoelectric Sensor, Mechatronics Filling Adjustment System, Material Level Control Feeding System
7. Stainless Steel Frame, Plexiglass as Security Cover
8. Control System: PLC/Electronic-Pneumatic Controlled
9. Capacity Adjustment: All cylinders adjusted automatically combine single cylinder adjusted individually.

Parameters

Filling material	Jam, Peanut butter, Honey, Meat Paste, Ketchup, Tomato Paste
Filling nozzle	1/2/4/6/8 can be adjusted by customers
Filling volume	50ml-3000ml customized
Filling precision	$\pm 0.5\%$
Filling speed	1000-2000 bottles/hour can be adjusted by customers
Single machine noise	$\leq 50\text{dB}$
Control	Frequency Control
Warranty	PLC, Touch screen
