

RH-5S Semi-automatic Packaging Machines

Features:

1. Weighing without bucket
2. Both the large and small shots are vibrating feeding, and the amplitude is continuously adjustable.
3. Sealing method: heat sealing machine, hand-held sewing machine;

Note: The appearance of the model is for reference only and supports customization. Please refer to the actual product.

Equipment process of powder packaging machine:

power on→ lifting materials on the machine → material into the packaging machine silo→ set packaging machine parameters (nominal peeling and packaging weight) → equipment operation→ manual material → sealing (PE bags with heat sealing machine, nylon woven bags with hand-held sewing machine) → packaging finished product output → manual packing.

Technical Parameter:

- Model (TYPE): RH-5S
- Weighing range (g): 100g-3kg
- Packing specification: 100g-6kg
- Single scale error (g): $\leq \pm 2-4g$
- Packing speed: 22-16bag/min
- Voltage (Power voltage): 220V/50HZ
- Power (Power): 500W
- Dimension (L): 1100mm×(w)960mm×(H)2250mm
- Machine weight: 220kg
