

FFT-C2 Cellophane Wrapping Machine

This series packing machine could adopt many feeding ways, could feed the product by manual, and also could connect with different model of boxing machine.

According to the requirements, we developed the new pull standing device and stacking device. It could pack multiple parallel boxes packages (1*5, 1*10 packets, etc) and group packages. It adopts the photoelectric sensor and cylinder pushing, reduce the friction and extrusion to the products, keep the product well.

Parameter:

Packing speed	20-300 boxes/min
Stable speed	250 boxes/min
Voltage	220v 50Hz
Power	0.4Kw
Size (box)mm	L(80-180)*W(70-150)*H(10-50)
Weight	100kg
