

## *DZ-260 PD Desktop Vacuum Packaging Machine*

DZ-260 PD desktop vacuum packaging machine used microcomputer program control, according to the need to accurately set the control vacuum, sealing and other work procedures, so that vacuum packaging sealing more accurate and consistent. The machine has the advantages of simple structure, stable performance, easy maintenance, small size, low power consumption, short pumping time and so on. Just press the vacuum chamber cover to complete the vacuuming, inflation (optional) Sealing, printing, cooling, exhaust the entire process. The vacuum packed items to prevent oxidation, mildew, insects, moisture to extend the shelf life of the product. Vacuum pump is a powerful vacuum pumping capacity, the size of the vacuum chamber table for the standard size, if the customer has special requirements, we can customize according to customer requirements

### **Features:**

1. The control system: computer control panel, a variety of control options for customers to choose
2. Vacuum pump: strict quality control system to ensure the safe and stable operation for the heart of the vacuum machine
3. Vacuum cover hinge: a special vacuum cover labor-saving hinge device, significantly reducing the labor intensity of workers in their daily work, easier to deal with
4. Suspension system: vacuum pump motor's unique shock-absorbing design to keep the machine always low noise at work.
5. The main body material: the main structure of the vacuum machine materials are 304 stainless steel, to ensure that the appearance of the beautiful and corrosive environments in harsh corrosion
6. V-shaped seal: this machine is made of high-density V-shaped vacuum chamber seal to ensure that the machine in daily work of the seal, the pressure and wear resistance of materials to extend the service life of the seal, reducing the number of replacement, reduce production costs
7. High-quality plexiglass vacuum cover, solid transparent, vacuum packaging can be packaged within the process and status at a glance.

**Application Scope:**

Meat, pickled products, aquatic products, seafood, vegetables, agricultural and sideline products, preserved fruits, food, soy products, herbs, electrical appliances and other small items of vacuum packaging.

**Technical Parameters:**

<b>Model</b>	<b>DZ-260 PD</b>
Machine Size(mm)	480×330×320
Vacuum Chamber size(mm)	385×280×100(50)
Heat sealed valid size (mm)	260×8
Vacuum pump(m <sup>3</sup> /h)	10
Motor pump(kw)	0.37
Voltage(V)	110/220/240
Rate(Hz)	50/60
Working Cycle(times/min)	2
Gross Weight(kg)	42
Net Weight(kg)	35
Carton Size(mm)	560×410×380
