

Lab Mixer for Dry Powder V-5

This machine is mainly used in pharmaceutical, chemical, electronic, food and other industries for powder, granule and other materials uniform mixing. Structural Features: This machine is mainly composed of mixing cylinder, frame, transmission system, electrical system and other parts, it is the use of two asymmetric cylinder, gravity mixing, the material in the cylinder continuous accumulation, continuous dispersion, generally after about 5-15 minutes of mixing.

Technical Parameters:

- Model No.: V-5
- Application: Powder, Medicine Processing, Chemicals Processing, Food Processing
- Max. loading volume: 3L
- Range of spindle speed: 1-12rpm
- Weight: 40kg
- Voltage: 220V 380V 415V 440V
- Power: 0.37kw
- Mixing time: 4-8min
