

## Link-40DS Carton Cardboard Box Erecting Forming Machine

Link – 40DS electricity high speed out of the machine is suitable for electricity type small specifications carton forming and molding back automatically, adopt cylinder forming mechanism, forming the speed depends on the carton size, can wiring or stand-alone operations, suction box, the bottom of the forming, folding, a complete back cover, adhesive tape and the cartons without alarm function, the cartons stored in vertical, may at any time add empty carton, without stopping, Suitable for batch use of the same specification carton at the same time, manual adjustment when changing specifications, standard machine surface height is 1050mm; Standard models are directly applicable to 6#-12# e-commerce cartons.

### Technical Parameters

model	Link-40DS
Applicable to the power supply	380V/ 50Hz / 1.5KW
Work pressure	6kgf /cm <sup>2</sup> 400 nl/ min
Packing specification	130≤L≤260;80≤W≤150;90≤H≤180;
	L+W≤410;130≤W+H/2≤255mm
The belt speed	15-25 Boxes / min
Packing tape	BOPP/PVC
Tape size	W48mm
Installation dimensions	L 1980 * W 1250 * 1700mm
The net weight	800Kg
