

CJZD50I Packaging Machine

CJZD50I packing machine is a equipment which packs granular material with good fluidity into big bag. This machine has the functions of auto weighing and auto filling, and complete auto packing according to set weighing specification

Features:

- With featured feeding control and auto compensation function in advance, make sure the speed of weighing and provide assurance for weighing of accuracy.
- Adopt sealing structure design and reduce corrosion and intervention of dust. Improve the working environment of packing machine and enhance working life of weigher
- Feeding of materials is adjustable, and can flexibly set the working parameter of packing weigher and make the working of packing weigher in the best state.

Specification:

Production mode	CJZD50I
Product mechanism	Single weigher
Package specification	25kg ~50kg
Packing speed	8~12 bags/min
Packing accuracy	±2‰
Package bag	PP woven bag
Width of bag	450~600mm
Length of bag	600 ~ 1100mm
