

High Speed Tablet Pill Press Industrial Machine GZPK

GZPK high-speed rotary tablet press mainly is used in pharmaceutical industries, it can also be used in chemical, food, electronic and house wares industries. It is a facility that presses various particle materials into tablet. It can also be used to produce various tablets with exceptional figures, graphs, and tablets with letters on both sides etc. These machines are suitable for producing round and exceptional tablets in large scale like medicines, sweets, calcium etc

Feature:

The machine is fully-enclosed, made of stainless steel, meet the G.M.P requirement. It has transparent windows so that press condition can be observed clearly and the windows can be opened. Cleaning and maintenance is easier. The machine can press not only round tablets but also different geometrical shape tablets, annular tablets, and the tablets may have the impressed letters on both sides. A power suction unit is attached to take the residual powder during operation so that the blockage powder can be collected and be reused. An overload protection unit is included in the system to avoid the damage of the punches and apparatus. The machine's worm gear drive adopts fully-enclosed oil-immersed lubrication with long service-life, preventing cross pollution.

Specifications

Model	GZPK-26	GZPK-32	GZPK-40
Dies	26	32	40
Max. pressure (KN)	80	80	100
Max. dia. of tablet(mm)	25	16	13
Max. depth of filling(mm)	20	16	16
Capacity (tablets/h)	160000	210000	260000
Power(w)	110V 60Hz / 220V 50Hz	110V 60Hz / 220V 50Hz	110V 60Hz / 220V 50Hz
Weight	1920kg	1920kg	1920kg
Dimensions	930x850x1945mm	930x850x1945mm	930x850x1945mm
