

ZX-F 02C One-Piece Silo Double-Head Screw Feeding Weighing Machine

It can be adapted to the direct weighing packaging of most powder materials, which can effectively solve the problem of material packing of cotton, sugar tea and other relatively large humidity.

Feature

- PLC control, Chinese touch screen operation, just enter the weight parameter, the system automatically calculates the fast value added, the medium value added, the slow value added;
- Screw squeeze feed;
- Stepper motor (or servo motor) drive. The fast, medium and slow three speeds are continuously adjustable, which is fast and accurate;
- The electronic scale is directly weighed.

Technical Parameters:

Packing specification	30-3000g
Packing accuracy	$\leq\pm 3\%$
Packing speed	16-40 bags/hour
Size	1200*850*1900mm
