

## *TTG-II Filling-Screw Machine*

This machine is classical filling sealer series and suitable for filling and clamping caps for rounded and irregular bottles. It adopts separate quantitative of liquid on plate-positioned. It has such advantages as no bubbling, no overflowing, stable working status and easy maintenance, thus it is an ideal filling equipment. Customers may choose purchase dustproof cover and the function of stopping filling without bottle.

### **Technical Parameter**

- Productive capacity: 30-60bottles/min
- Filling capacity: 20-50ml
- Error of filling:  $\leq \pm 2\%$
- Cap-feeding ratio:  $\geq 90\%$
- Cap-clamping ratio:  $\geq 90\%$
- Power: 380V 50Hz 1.2kW
- Net weight: 650kg
- Overall Dimension(LxWxH): 2440x780x1600mm
