

GTW 450-150 On-edge Packaging Machine

This machine is (a) on-edge auto packer, which can realize scattered pieces aggregate packing without tray. Application (It can be applied) to Biscuit, Snow pastry, chocolate, Table and Soap etc. which has regular shape goods, widely used in food processing pharmaceutical and chemical engineering.

Equipment Characteristic:

- Using coil film can complete the entire packing process automatically. (Bag maker, filling, sealing and cutting off)
- The centralized control of the whole unit is done by PLC, which can reduce the fault point, makes the performance stable and maintenance more easy.
- Packing velocity. (Packing velocity is easy adjusted by frequency conversion)
- Man-Machine Contact Surface: It shows packing velocity, bag length, packing output and the troubleshooting, meanwhile can directly set thermal sealing temperature, parameter adjusting, and makes the operating fast and simple.
- Photo sensor inspecting and double direction tracing can effectively eliminate the packaging error.
- Adopt the over-load protection, the leakage protection, error alarming etc advanced technology and safety device, and the functions complete.
- The packaging machine match with pendulum material conveyer and the input conveyer two kind of appendages, the structure is complete.
- Without tray can save cost and reduce the pollution.

Main technical parameter of GTW 450-150 on-edge packer

model	GTW 450-150
Size Scope of Packing Material	L:80-240 W:40-80 H:35-70
Max Film Width(mm)	450mm
Packing Velocity(packs/min)	30-80
Out Size(mm)	5000×960×1750
Overall Power(kw)	4.2kw
Machine Weight	1300kg
Power	380v 50hz
Packing Material	OPP/PE,PT/PE,OPP/BOPP and Heat-sealing Compound Film
