

## LFUC-1210 & 1810 Bi-Directional Conveyor

LFUC-1210 & 1810 bi-directional conveyor is mainly applicable for pharmaceutical, healthcare and food industries. The application materials are all kinds of impact-resistant container round bottles for slowing down and storing.

The machine has the advantages of simple structure, easy operation, easy installation and transportation, low repair rate, convenient handling, and slowdown and storage function. LFUC-1210 and 1810 can be set to different speeds according to different requirements to meet various users' requirements.

In practical application, LFUC-1210 and 1810 are generally used in conjunction with other machines such as cappers; Counter, sealer, labeler and cartoner to accumulate on a complete packaging line. They are connected with all kinds of automatic lines at the same time.

### Technical Parameters

Model	LFUC-1210&1810
Bottle diameter	25~100mm
Bottle Height	30~180mm
Compressed Air Pressure	N/A
Compressed air consumption	N/A
Power Supply	AC220V 50Hz/60Hz 360W
Physical Dimension	Aprox.1400(L)×530mm(W)×1030mm(H) (sola)
Bottle Base Dimension	947mm(L)×331(W) (sola)
Weight	Aprox.100kg (sola)
