

## *XT-LPZP-120 High Speed Automatic Bottle Unscrambler*

The XT-LP-120 automatic bottle unscrambler consists of a bottle-up machine, a turntable, a bottle-removal component, a vial component and an electrical box. A large number of unordered bottles are put into the turntable of the turntable by the loading machine, and are conveyed to the bottle-receiving area through the conveyor belt so that the bottle can be erected and conveyed to the user's conveyor belt. The model has compact structure, simple principle, mature technology and stable and reliable operation.

### **Technical parameters:**

Model	XT-LPZP-120
Production capacity	10- 220 bottles/minute
Adapt to the bottle type	Diameter $\Phi$ 40-90 mm, (H) 80-240mm
Applicable bottle height	80-240 mm
Air source pressure	0.5 to 0.7 MPa
Power Supply	220V 50~60HZ 2500W
Machine size	3200×1600×1900 mm (length×width×height)
Total weight	About 450 KG
