

## ***Automatic Dropper Bottle Filling and Capping Machine CHS-50***

The machine performs automatic filling, automatic capping, and automatic screw capping. It is equipped with PLC control, allowing functions such as no bottle no filling, and no cap no capping, as well as continuous stoppage and rejection of defective products due to missing caps.

### **Introduction**

The CHS-50 filling and capping machine is a new generation product developed by our company based on years of experience in producing similar products and incorporating feedback from numerous customers' needs. This machine is suitable for industries such as pharmaceuticals, food, and chemicals, and is designed for low viscosity materials. The entire control system of the machine applies programmable control technology and utilizes a human-machine page for operation. It features a compact structure, easy operation, and stable performance.

### **Specifications**

Model	CHS-50
Power	1.5KW
Production capacity	20-30p/min
Power supply	220V 50Hz
Comressed air	0.5-0.6MPa
Max.filling volume	30ml
Filling accuracy	$\leq \pm 1\%$
Dimensions	2400 * 1600 * 1600 mm
Weight	500Kg
