

BD-12 Multi-Line Automatic Packaging Machine

BD-12 Multi-Line Automatic Packaging Machine. Multi-lane automatic packaging machine adopts bar pillow sealing type. Bag looks nice. Apply for the granular packing in the industry of foodstuff, medicine, chemical and so on. Use this model can save manpower, improve efficiency of production and suitable the standard of sanitation. This machine can be made special for the customer requirement from 4-10 lines. The bag length can be set discretionary inside the standard range without change any device. The stable and reliable bag-pulling type of horizontal sealer adopts advanced servo motor; it can improve the packing speed and ensure the accuracy of the bag length. Adopts the import ball bearing bar and line type guiding rail, ensure the machine's running precision and reliability. Adopts the import PLC and touch-screen, be of high reliability and stability. The progressing of the horizontal sealing, vertical sealing, cutting and material dropping are finished by pneumatic. Each of working procedure is running precise and stable, reduce the machinery abrasion and extend the longevity. Easy program setting for user operate. It just needs to set the bag length and packing speed, PLC will output the optimization packing program. Make operate be more easy.

Technical Parameters:

Model	BD-12
Production Capacity	200-700 bag/min (depend on the material and specifications)
Measuring Method	Volumetric
Bag Size Range	(L) 50-160 mm, (W) 16 mm
Filling Capacity	No.1: 1-5 ml, No.2: 2.5-9 ml
Max Width Of Wrapper	470 mm
Max Out-Diameter Of Wrapper	φ 420 mm
Inner Diameter Of Wrapper	φ 76 mm
Working Air Pressure	0.6 Mpa
Air Consumption	500 L/min
Power	380V,50Hz,6.8Kw
Packing Size	1500*1850*2500 mm
Packing Weight	1100 Kg
