

HCCW-150/220/300 Online Check Weighing and Rejecting Machine

Automatic weighing and sorting equipment is a high-speed, high-precision online weighing equipment that can be integrated with various packaging production lines and conveying systems. Also known as underweight detection machine, weight sorting machine, weight sorting machine, re-inspection machine, automatic weighing machine, weight sorting machine, check weigher. Can be widely used in pharmaceutical, daily chemical, food, chemical, battery, hardware accessories, electronics, plastics, and other industries.

Features

- ◆ Color touch screen; like a smartphone, easy to operate.
- ◆ Quick belt replacement system; with buckle design, it is very easy to clean the belt.
- ◆ As many as 10 shortcut menus, seamlessly connect and change products, and realize switching products without stopping the machine.
- ◆ Query and print unqualified products.
- ◆ Provide feedback signals of production trends, so as to adjust the packaging accuracy of upstream packaging machines in time, improve user satisfaction and reduce costs.
- ◆ The shunting and rejecting device that keeps pace with the times prevents the product from falling down during the sorting process and spilling the material, ensuring the integrity of the detected object.

Technical parameters

Model	HCCW-150	HCCW-220	HCCW-300
Weighing Range	5-500g	5-1200g	5-3000g
Highest Sorting Accuracy	±0.1g	±0.5g	±1g
Display Resolution	0.1g		
Height Of Conveyor Belt From The Ground	720mm±50mm		
Weigh Part Of The Material	ASUS304 Stainless Steel Material		
Culling Method	Push Rod Type Rejection
