

HC-180SDY Duplex Horizontal Form Fill Seal Doypack Packing Machine

Special shaped pouch fill-seal packing machine has a wide range of applications, such as the daily chemical industry, agrochemical industry, veterinary drug industry, pharmaceutical industry, health care product industry, etc.;

Irregular shaped sachet packing machine can be used for packaging such as paper-plastic composite, plastic-plastic composite, aluminum-plastic composite, PE composite, etc. Material and packaging material loss are low, the packaging bag pattern is perfect, and the sealing quality is good, thereby improving the product grade;

Special shape bag packing machine can also be used for multiple purposes, and shape pouch filling machine only needs to be equipped with different metering devices according to different materials to achieve granule, powder, block, liquid, Fully automatic packaging of soft cans, toys, hardware, and other products.

Technical specifications:

Model	HC-180SDY
Type of Pouch	Shaped Doypack Pouch
Min. pouch size	60*120mm
Max. pouch size	90*170mm
Packing speed	70-90 pouch/min
Packing range	30-60ml (max.)
Packing Station	2
Power	8KW
Volt	AC380V、50Hz.
Air Consumption	400L/min.
Air Pressure	0.6-0.7Mpa.
Machine Weight	2500kg
Machine Dimension	6100mmx1000mmx2100mm
